Gary, yes, early on during the RI we had a discussion with NORCO about the docking facility and considered it part of the Site investigation. We sampled the sediments, in Red Fish Bay, near the dock facility during the Phase I RI and plan to sample again during Phase II. Also, we considered the pipelines extending from the main facility to the docking facility as part of the Site as well. As you are aware, these pipelines, except for the active ones, have been cleaned under a removal action several years ago.

Rafael/Gloria:

Lazarus is asking me if the dock are that Superior Crude is using that belongs to the facility is part of the site. They want to get a loan against it to possibly get me my performance bond and then get you the money I have in house. I don't remember it being or us considering it part of the site but I need your feedback.
